**WARNING.** To avoid serious injury:  
**SAFETY PRECAUTIONS** during operation and maintenance  
 Parents/adult supervisors read this page first

**MUST BE ASSEMBLED BY AN ADULT.**  
**PARENTAL AND ADULT RESPONSIBILITY AND SUPERVISION ARE NECESSARY.**

**PARENTS/SUPERVISING ADULTS MUST TEACH CHILDREN HOW TO SAFELY RIDE THIS PRODUCT.** If the rider fails to use common sense and heed these warnings, there is an increased risk of damage, serious injury or possibly death.

**Riding this Product Presents Potential Risks.**

- Like any riding product, this product can be hazardous (for example, falling off or riding into a hazardous situation). This product is, of course, meant to move and it is therefore possible for a rider to lose control or otherwise get into dangerous situations.
- Both children and adults responsible for supervising them must recognize that if such things occur, a rider can be seriously injured or possibly die, even when using safety equipment and taking other safety precautions.

**USE WITH EXTREME CAUTION.**

**Parental and Adult Responsibility and Supervision are Necessary.**

Because this product can be hazardous -- and not every product is appropriate for every age or size of child -- different age recommendations are found within this category of product which are intended to reflect the nature of the hazards and the expected mental or physical ability, or both, of a child to cope with the hazards. Parents and supervising adults need to select riding products appropriate for the age of the child who will ride this product and take care to prevent children who may be too immature or inexperienced for a product's characteristics to endanger themselves around it.

- The recommended rider age for this product is 8 years of age and older. Any rider, even 8 or older, unable to fit comfortably on this product should not attempt to ride it. A parent's decision to allow his or her child to ride this product should be based on the child's maturity, skill and ability to follow rules. Keep this product away from small children and remember that it is intended for use only by persons who are, at a minimum, completely comfortable and competent while operating this product.
- Maximum rider weight 54 kg.
- Persons with any mental or physical conditions that may make them susceptible to injury, impair their physical dexterity or mental capabilities to recognize, understand, and follow safety instructions and to be able to understand the hazards inherent in PowerRider 360 use, should not use or be permitted to use products inappropriate for their abilities. Persons with heart conditions, head, back or neck ailments (or prior surgeries to these areas of the body), or pregnant women, should be cautioned not to operate such products.

**Proper Riding Equipment, Clothes, Shoes**

- Always wear proper protective equipment, such as an approved safety helmet (with chin strap securely buckled), elbow pads and kneepads. A helmet may be legally required by local law or regulation in your area. In addition, a long-sleeved shirt, long pants, and gloves are recommended.
- Always wear athletic shoes (lace-up shoes with rubber soles), never ride barefoot or in sandals, and keep shoelaces tied and away from the wheels, motor and drive system.

**Failure to use common sense and heed the above warnings further increases risk of serious injury. Use with appropriate and serious attention to safe operation. Use caution.**

**Maintenance**

- Before use, confirm that any and all chain guards or other covers or guards are in place and in serviceable condition, that the brake is functioning properly and that the front tire has sufficient tread remaining. Make sure that the rear wheels have no flat areas or excessive wear.
- Regularly check that the various screwed parts are tight, particularly the wheel axles because the self-locking screws or other attachments may lose their effectiveness.
- The steering column fixing nut is reusable until the nylon material no longer provides an impediment to threading the nut to the pivot anchor. If the nut can be hand threaded beyond the nylon insert, replace with new part.
- Make sure caster wheels have been installed properly; see assembly instructions.
- After use, maintain and repair this product in accordance with the manufacturer's specifications in this manual. Use only the manufacturer's authorized replacement parts. Do not modify this product from the manufacturer's original design and configuration.
- Wipe with a damp cloth to remove dirt. Do not use alcohol, alcohol-based or ammonia-based cleaners as they may damage the plastic components.
- If repairs are needed, bring product to a qualified technician.

**WARNING:**

**Acceptable Riding Practices and Conditions – Parents/adults should discuss these rules with their children**

- **Protective equipment should be worn. Not to be used in traffic.**
- **This toy is unsuitable for children under 6 years due to its maximum speed.**

**Where to Ride**

- Always check and obey any local laws or regulations which may affect the locations where this product may be used. Keep safely away from autos and motor vehicle traffic at all times and only use where allowed and with caution.
- Ride defensively. Be careful to avoid pedestrians, skaters, skateboards, bikes, children or animals who may enter your path. Respect the rights and property of others.
- This product is intended for use on flat, dry surfaces such as pavement or level ground, without loose debris such as sand, leaves, rocks or gravel.
- Wet, slick, bumpy, uneven or rough surfaces may lessen traction and increase the risk of accidents.
- Do not ride this product in mud, ice, puddles or water.
- Watch out for potential obstacles that could catch your wheel or force you to swerve suddenly or lose control.
- Avoid sharp bumps, drainage grates, and sudden surface changes.
- Do not ride this product in wet or icy weather and never immerse this product in water, as the electrical and drive components could be damaged by water or create other possibly unsafe conditions.
- Never ride damaging surfaces such as carpet or flooring by use of this product indoors.
- Never use near steps or swimming pools.

**How to Ride**

- Do not use the speed control (push button throttle) on the hand grip unless you are seated on the product and in a safe, outdoor environment suitable for riding.
- When seated with feet firmly placed on the front foot pegs, push the throttle button to go. To stop, take finger off of the button and squeeze the left hand brake. Practice braking in a controlled environment.
- The rear, inclined caster wheels enable sideways drifting and spinning. Practice turning the handlebars, slowly and gradually until spinning and drifting maneuvers are mastered.
- Hold the handlebars at all times while you are riding.
- Do not touch the brakes or motor on the product when in use or immediately after riding as these parts can become very hot.
- Avoid excessive speeds associated with downhill rides, because you might lose control.
- Do not ride at night or when visibility is limited.
- Do not attempt or do stunts or tricks on the product. The product is not strong enough to withstand misuse and abuse such as jumping, curb grinding or any other type of stunts. Racing, stunt riding, or other maneuvers also increase the risk of loss of control, or may cause uncontrolled rider actions or reactions. All of these could result in serious injury or possibly death.
- Never allow more than one person at a time ride this product.
- Do not allow hands, feet, hair, body parts, clothing, or similar articles to come in contact with moving parts, wheels, or drivetrain.
- Never use headphones or a cell phone when riding.
- Never hitch a ride with a vehicle.

**Using the Charger**

- Never modify the electric system. Alteration could cause a fire. Use of the wrong type of battery or charger could cause an explosion.
- **BEFORE EACH USE:** Charge the battery for AT LEAST 12 hours and inflate the tires to the correct PSI.
- Turn off after each ride. The battery may be unable to recharge if left "ON" without use.
- Do NOT store in freezing or below freezing temperatures! Freezing temperatures will permanently damage the battery.
- The charger supplied with this product should be regularly examined for damage to the cord, plug, enclosure and other parts. In the event of such damage, the product must not be charged until the charger has been repaired or replaced.
- Use only a charger recommended by Razor.
- The charger is not a toy. Charger should only be operated by an adult.
- Do not operate charger near flammable materials or an open flame.
- Unplug charger and disconnect from the product when not in use.
- Do not exceed charging time.
- Always disconnect product from charger prior to wiping it down or cleaning with a damp cloth.
